

Minor Service

Longevity:

- Change engine oil, oil filter and drain plug washer
- Inspect air cleaner element
- Inspect engine and transmission mount condition
- Inspect wheel alignment / unusual tire wear
- Rotate tires, front to rear as required
- Inspect power steering hydraulic system
- Inspect drive axle joint condition
- Lubrication and treatment of: battery terminals, transmission linkages, brake components, hood, trunk and door hinges, pedal assemblies, suspension components, door strikers, window run channels and steering mechanisms
- Refill all fluid levels including: washer reservoirs, coolant, power steering fluid, clutch fluid, battery electrolyte, transmission oil, brake fluid, final drive fluid
- Lubricate all body seals, weather stripping, hinges and run channels

Preventative and Safety:

- Test battery, charging and starting systems
- Test and inspect radiator and cooling system hoses
- Assure proper engine cooling fan operation
- Inspect alternator, air conditioner and power steering drive belts
- Assess transmission shift quality and function
- Inspect exhaust system condition
- Road test of vehicle to assure all systems are operating properly
- Assure interior/exterior and accessory lamp function
- Inspect fuel components and lines for leakage
- Inspect tire condition and reset tire pressures
- Reset spare tire pressure

Preventative and Safety (continued):

- Inspect steering gear/tie-rod condition
- Inspect suspension components for looseness or excessive wear
- Assess condition of front and rear brake linings, disks, drums, wheel cylinders and calipers
- Inspect brake hydraulics, lines, and fluids for condition
- Adjust parking brake as required

Comfort:

- Performance testing of climate control and defrost systems

Refill Vital Fluid Levels Including:

- Window washer, power steering, brake, transmission, differential and clutch (if equipped), and engine coolant

Road test vehicle to confirm proper systems operation after servicing is complete.

SPEED AUTO REPAIR

AUTO REPAIR • OIL CHANGE • EMISSIONS • TIRES

Friendly Service. Fast!

Intermediate Service

Longevity:

- Change engine oil, oil filter and drain plug washer
- Rotate tires, front to rear as required
- Check brake linings
- Change brake fluid in reservoir
- Fuel injection service

Preventative and Safety:

- Test battery and charging system
- Test all interior and exterior lights and accessories
- Test engine cooling fan operation
- Inspect radiator and coolant hoses
- Inspect fuel line condition
- Inspect transmission linkage and function
- Inspect brake calipers and wheel cylinders
- Inspect engine air cleaner element
- Inspect brake discs and pad linings
- Inspect brake lines, hoses and fluid level
- Inspect and tighten suspension and under car mounting bolts
- Inspect steering gear and tie-rods for excessive play
- Inspect exhaust system for proper mounting and leakage
- Inspect tires for excessive wear and reset tire pressures
- Inspect condition of alternator, A/C and power steering system
- Inspect wiper and washer operation and condition of wiper blades

Comfort:

- Measure temperature and operation of air conditioner system
- Inspect and assess comfort items (seat heaters and coolers)

Refill All Fluid Levels Including:

1. Washer reservoirs
2. Differential fluid
3. Power steering fluid
4. Clutch fluid (if equipped)
5. Battery level
6. Radiator coolant
7. Brake fluid
8. Transmission oil

Lubrication of Recommended Areas:

1. Battery terminals
2. Clutch release fork
3. Door hinges
4. Deck lid hinges
5. Pedal linkages
6. Engine hood latch
7. Engine hood hinges
8. Brake equalizer
9. Door strikers
10. Window channels

Road test vehicle to confirm proper systems operation after servicing is complete.

*This service is recommended to be performed every 15,000 miles or every year (whichever occurs first).

SPEED AUTO REPAIR

AUTO REPAIR • OIL CHANGE • EMISSIONS • TIRES

Friendly Service. Fast!

Major Service

Longevity:

- Change engine oil, oil filter and replace drain plug washer
- Replace engine air filter element
- Replace cabin HEPA filter
- Drain and refill differential fluid (if equipped)
- Replace transmission fluid
- Rotate tires (as needed)
- Inspect spark plugs
- Replace brake fluid
- Fuel injection cleaning
- Check alignment

Preventative and Safety:

- Road test vehicle to assess all systems for proper operation – make note of any abnormalities
- Test battery, charging and starting systems
- Inspect radiator and cooling system hoses
- Confirm proper engine cooling fan operation
- Inspect accessory drive belts and related tensioner assemblies
- Inspect exhaust system condition
- Assure interior/exterior and accessory lamp function
- Inspect fuel components and line condition
- Inspect tire condition
- Reset tire and spare tire pressure
- Inspect steering gear/tie-rod condition
- Inspect suspension components for looseness or excessive wear
- Inspect and measure front and rear brake components including: linings, disks, drums, wheel cylinders and calipers
- Inspect brake hydraulic lines and fluid condition
- Adjust parking brake as required

Comfort:

- Assess operation and function of climate control system
- Assess interior comfort items (seat heaters/coolers) for proper operation (if equipped)

Refill Vital Fluid Levels Including:

- Window washer, power steering, brake, transmission, differential and clutch (if equipped), and engine coolant

Lubrication of Recommended Areas:

1. Battery terminals
2. Clutch release fork
3. Parking brake equalizer
4. Door hinges
5. Pedal linkages
6. Engine hood latch
7. Engine hood hinges
8. Deck lid hinges
9. Door strikers

Road test vehicle to confirm proper systems operation after servicing is complete.

*This service is recommended to be performed every 30,000 miles, or 2 years (whichever occurs first).
